This eight-disc video/DVD set of presentations and written submissions is the result of two 2-day conferences, held in Maine and Georgia, August 2012 and August 2013. Fifteen of the nation's most respected education and political researchers, writers, and speakers, including public school teachers, some in the trenches since 1965, were videotaped. Written submissions are included from the speakers, as well as from those who could not attend the conference.

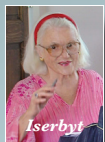

Their research is *YOUR TOOL KIT: ammunition to fight and win the government/corporate/tax-exempt-foundation-funded war against our children and grandchildren, and against our free constitutional republic, very aptly illustrated by the following cartoons (text edited) by Joel Pett, published in Phi Delta Kappan, 1983.*

Limited learning for lifelong labor through tax-funded school choice means:

- End of traditional academic public schools
- End of elected school boards
- Parents will have *NO SAY* in their children's education.
- Control/end of private, religious and home education
- Charter schools for Soviet-style polytechnical workforce training.

This is called "Taxation without Representation"! The American Revolutionary War was fought to obtain citizen representation in the expenditure of their taxes. Americans must hold onto this lynchpin of freedom in order to continue our culture.
